

## ACOUSTIC ABSORBER

Wide frequency band  
Compact and easy to install  
Versatile

**SilentFlow** is a circular acoustic absorber for rectangular or circular HVAC ducts with diameters from 80 to 315 mm. As effective as a traditional silencer in the mid-range frequencies, it incorporates an electronic device that boosts performance in the low frequencies with a short treatment length.

### Transmission Loss - Third octave band

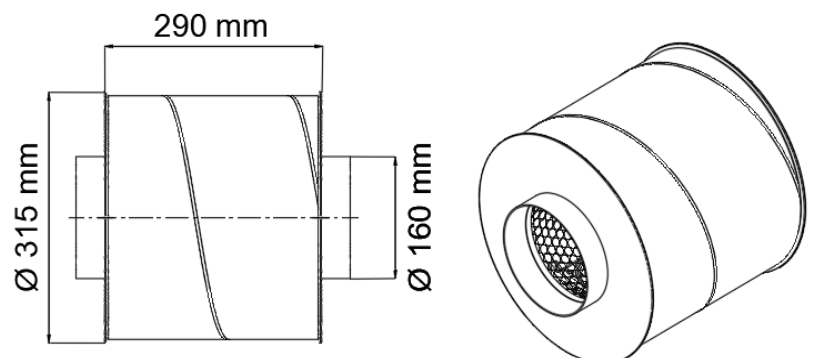

According to ISO7235

|      | TL   |
|------|------|
| 63   | 2.6  |
| 80   | 2.6  |
| 100  | 2.5  |
| 125  | 4.7  |
| 160  | 5.8  |
| 200  | 5.3  |
| 250  | 6.7  |
| 315  | 15   |
| 400  | 15.3 |
| 500  | 19.5 |
| 630  | 22   |
| 800  | 18   |
| 1000 | 15   |

### Specifications

|               |               |
|---------------|---------------|
| Int. diameter | 160 mm        |
| Ext. diameter | 315 mm        |
| Length        | 290 mm        |
| Mass          | 4.7 kg        |
| Elec. supply  | 110-220V / 5W |
